

Revving Up Sustainability: The Power of Smarter eFleet Solutions!

Webfleet telematics data combined with Bia's optimisation software, helps maximize reliability and productivity of eFleets while minimizing peak load, energy costs and Co2 emissions

THE CHALLENGE

As fleets make the transition to electric vehicles, managing charging infrastructure can be a complex and expensive process. Fleet managers have new charging assets to manage in connection with their fleets, through multiple new interfaces. And, on top, unmanaged charging can lead to operational inefficiencies and unnecessary costs. That's where Webfleet and Bia come in.

Leveraging both Webfleet's telematics expertise and Bia's cutting-edge charging solutions, they enable eFleets to operate efficiently and reliably with the lowest costs and cleanest charge, manageable through one easy to use interface.

THE SOLUTION

Webfleet integrated Bia's platform into their new Webfleet Smart Charging Module, allowing customers to monitor and experience optimized charging within the same interface. Webfleet integrates eFleet planning data and Bia leverages this to determine the optimal charging planning to maximize reliability.

IMPACT

Together, Webfleet and Bia, offer comprehensive smart eFleet solutions. They ensure full telematics data and real time analytics and control to ensure the lowest cost and cleanest charge with improved eFleet operations.

BIA

Bia delivers cutting-edge software to optimise eFleet and eBus charging. Bia's software is designed to reduce costs, improve operations, and deliver critical systems integrations for EV charging.

ABOUT STARTUP AUTOBAHN

STARTUP AUTOBAHN powered by Plug and Play is an open innovation platform that provides an interface between innovative tech companies and industry-leading corporations. The basis of the program is the partnership that develops between startups and the corporate business units. The two entities hold an equal footing from the get-go: together they evaluate the potential for a joint venture, move forward to pilot the technology, and work to achieve the ultimate goal – a successful production-ready implementation. Designed with the intention to exceed startup acceleration, STARTUP AUTOBAHN powered by Plug and Play moderates a community for collaboration with a focus on implementable results. Over the years, the platform has successfully cultivated over 400 projects with more than 300 startups since its founding in 2016.
